## ROCK SALT

Rock salt is mined all over the world. Regarding the salt industry, the source of the salt is very important issue. Today sea and lakes are getting polluted day by day. On the other hand salt mines are still clean and it is mined without being affected from environmental pollution. In addition, the refined rock salt with the lowest hardness level which is most healthy is preferred by the customer.

As BLD, we have unique advantage in getting excellent quality in rock salt. We offer you a range of specification package that includes *industrial salt*, *road deicing salt*, *food salt*, *feed salt* and *tablet salt* for water softening.

We offer our customers;

## QUALIFIED ROCK SALT

### Chemical Industry

Salt is the raw material for +1,000 chemical application. For example; production of glass, paper, paints, mineral oils, aluminium & metals, textiles, detergents, disinfectant, PVC and so on.

### Water Softening

Hard water is water that contains invisible dissolved rock, principally calcium and magnesium minerals. Salt is used to reduce the hardness of water. The problems regarding with hard water can be resolved by installing a water softener which removes the hardness minerals from the water.

### De-icing Salt

Since salt is a cost-effective de-icing agent compared to the alternatives, salt is the most widely used de-icing agent throughout the world.

### Food Grade Salt

The human body depends upon the various sources of salt in food to ensure its necessary daily intake. Salt has an important technological role in the manufacture of many foods as a preserver and a flavor enhancer.

### Animal Feed

Animals require salt to keep them healthy. The right salt intake ensures their growth, strong immune and reproductive systems. Animals do not receive enough salt from foraging and other feeds and for that reason it is necessary to supplement their diet with salt.

BLD Foreign Trade serves milling machines in areas such as grinding, cleaning, filtering, weighing and packaging systems and turnkey solutions in milling sector.

BLD Foreign Trade supplies all kinds of spare parts and factory materials needed in the milling sector to domestic and international customers at the most reasonable cost.

## MILLING INDUSTRY AND FACTORY EQUIPMENT

### Milling Industry

BLD Foreign Trade serves milling machines in areas such as grinding, cleaning, filtering, weighing and packaging systems in milling industry.

### Spare Parts

BLD Foreign Trade supplies all kinds of spare parts needed in the milling industry to domestic and international customers at the most reasonable cost.

### Turnkey Solutions

BLD Foreign Trade serves on turnkey solutions.

### Factory Equipments

BLD Foreign Trade supplies factory and industrial materials and equipments that you may need in your factory and facility.
